

Skills & Careers

WHAT YOU'LL LEARN AT MARWEN & WHERE ART CAN TAKE YOU

PATHWAYS

At Marwen, we inspire growth through art and community. Our courses provide essential skills that not only boost confidence but also extend beyond the arts, connecting creativity to diverse industries. Did you know that fashion designers work in aerospace, ceramicists in the auto industry, and animators in airlines?

Sometimes people struggle to see how art relates to professions—but Marwen helps make that connection. Art transforms lives, unlocking potential and equipping young people with many tools for success.

Marwen's Youth Pathway team supports students and families as they transition to high school, college, and/or the workforce and helps them identify opportunities to reach their goals. Our classes are for 6–12th graders, including those who are studying art or pursuing studies and work outside the arts. Our Emerging Teaching Artists program is for young adults seeking careers and experience in arts education.

Read on to review the range of art, career, and life skills Marwen builds and where those skills can lead.
